## What is Roof Magician?

Roof Magician is a roof estimation system based around a true 3D graphical design software package. It allows for the complete manipulation of roof designs with simple mouse operated commands, cover material and type descriptions of every manufacturer may be set up, and customisation of quotation report forms is standard.

## Why Roof Magician?

Roof Magician represents the latest and most powerful software currently available for roofing design and estimating - **suitable for tiles, shingles and slate**. The software features automatic roof design in full 3D, calculates all material and labour quantities and automatically inserts all information into your pre-defined reports.

## The Benefits

Roof Magician is a breeze to learn. In fact you could be up and running after just a few hours, thanks to picture menus and text menus that use terms that you currently use - no computer jargon. Roof Magician allows the operator to try many different options, and select the best roof arrangement; it provides fast and accurate quotations; input is via simple point and click with a mouse; all forms are automatically filled out and printed; graphical display for fast roof input. Roof Magician allows the operator to setup definition files for all roofing materials - shingles, slate and tiles may all be estimated in the one simple system.

## Full Job Cost Breakdown

Total roof area, total length of ridge, hips, valleys and gable ends. All the variables are accounted for: insulation, caps, special finish, installer's rates etc. Separate report forms for client, accounts, installer and job supervisor. Fully dimensioned 3D representation of any roof shape - multi-hips, skillion, gables, dormers, dutch gables, verandahs, atriums and multi-level. The software will even determine material by dividing the entire roof into courses, including a starter course, and add the appropriate waste factor.

Now, how accurate is that?

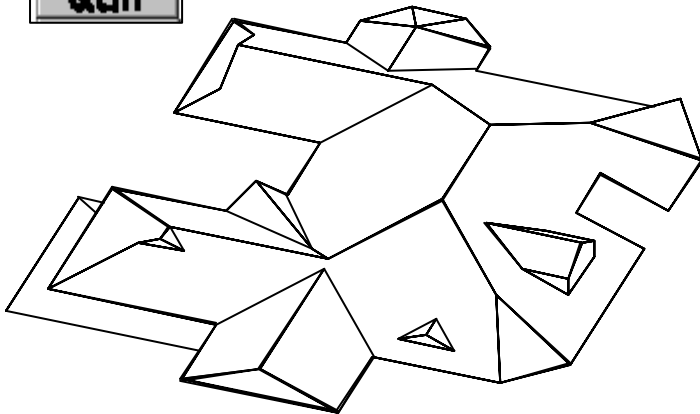

Obviously you must do the entire job, so let Magician take off all the flashings and gutters for you too, entirely automatically.

## Typical operators

Roofing contractors, roofing material distributors, resellers, manufacturers - anyone who requires quick and accurate results.

## No Risk Purchasing

A 30 day money back guarantee is available with every copy. Are you using the most effective tools in your business? What's stopping you? Call today.
