The AppliCad software shopping list

– is this something like your shopping list?   If so then make a call today to review what we can do for you.

Does your existing roof modeling and estimating software tick all the boxes?

- ✓ The most advanced true 3D roof modeling functions
- ✓ Most modifications are a single mouse click and in any 3D view of the roof/wall
- ✓ Full roof shape visualization and view control, including perspectives
- ✓ Import and export existing CAD geometry
- ✓ Exchange 3D roof geometry with roof truss design software
- ✓ Digitise from digital plans, satellite and aerial images
- ✓ Model complex multi-level and multi-pitch roof shapes
- ✓ Add architectural features such as dormers and gables with a single mouse click
- ✓ Automatically intersect different roof shapes
- ✓ Estimate multiple roofs in one model

- ✓ Automatic dimensioning of all roof features
- ✓ Any roof material, any roof system, any roof shape
- ✓ Tiles either by pieces/area or laid course by course (the most accurate method)
- ✓ Automatically generate custom trim workshop details
- ✓ User defined installation allowances for all trim – lap, corner and run allowance
- ✓ All roof trim and accessories – calculated based on method of supply and installation
- ✓ Panel layout plan, trim and flashing plan and purlin layout plan generated for each job
- ✓ Include roof sub-structure (purlins), insulation and underlayments
- ✓ Include fall barriers, roof fittings and fixtures
- ✓ Automatic metal panel waste optimizer by blocking or nesting panels
- ✓ Output panel cutting details to automatic rollformers
- ✓ Detailed material lists of all materials and accessories

- ✓ Add any labour or material item for a complete and detailed quotation
- ✓ Full quotation - labour and materials
- ✓ Multiple labour rate files for all your sub-contractors
- ✓ Labour calculation by roof pitch and storey
- ✓ Generate reports from user defined templates or export to MS Excel
- ✓ Complete document package including quotation, roof drawings and supplier orders
- ✓ Export complete job data set to any other business management software
- ✓ Generate an estimate or quotation without a roof model
- ✓ Fully integrated wall cladding modeling, estimating and quoting system
- ✓ Full function 3D CAD system included
- ✓ Inline and onscreen context sensitive help
- ✓ The most comprehensive learning guides and reference manuals (800+ pages)
- ✓ Unlimited undo and redo and automatic crash file recovers lost work
- ✓ Web site Tutorials, Online User Group and Blog
- ✓ Stage Manager® for better job management and material delivery scheduling
- ✓ Solar panel planning, rain water harvesting and sun shadow analysis
- ✓ Cut lists for gutters and downspouts and accessories
- ✓ Downspout placement drawing
- ✓ And a whole lot more….

AppliCad's Value Proposition

- ✓ Ease of Use
- ✓ Flexibility
- ✓ Better Investment
- ✓ More Useful Advanced Functions
- ✓ Tested in 37 countries
- ✓ Reputation and Support

If the shopping list doesn't do it for you, perhaps visit our web site and check out the detailed Product Overview where we give you a brief description of all the primary features and why they will help your business.

If this isn't enough, visit the AppliCad online Return On Investment (ROI) calculator – www.applicad.com.au/product-savings.html and see how you can achieve a 333% return in the first year from the estimating department alone.
