Sorcerer

the complete solution for professional roof estimating
Simple - Fun - Effective

The successful roofing contractor usually involves the business in many aspects of roof restoration and fabrication. Such a business must have the most up to date technology to satisfy the customer's needs in a timely fashion with professional looking documentation that is accurate and reliable.

Wise investment in new technology is an imperative in today's competitive environment. Such investments also demonstrate their value when viewed in terms of the 'cost benefit'. **Sorcerer** is such an effective program it will pay for itself in just a few months on the basis of just one quotation a day.

Consider this:

Take a single job that would typically take say 35 minutes using traditional methods. **Sorcerer** has the technology that allows you to complete that same task in just 5 minutes - a saving of 30 minutes. Saving 30 minutes each day adds up to an amazing 100 hours over a year - on just one job a day! Even at modest hourly charge rates, **Sorcerer will pay for itself.**

Sorcerer combines the power of all the AppliCad roof estimating programs in one totally integrated solution - the 3D roof modeling functions of Roof Master, plus the powerful material optimisation functions of Wizard (metal roofing), Magician (tile, shingle and slate roofing) and Maestro (BUR and single ply roofing).

You model the roof, select a material, print the estimate and material list - that's it!

Put simply, **Sorcerer** is the complete roof estimating solution for all your roofing needs. It not only quantifies the base material requirement, but all accessory items and labour as well.

Can you afford not to have a Sorcerer working for you?
